

## **Mitigation Monitoring and Reporting Program**

This Mitigation Monitoring and Reporting Program (MMRP) has been formulated based upon the CEQA Findings and Statement of Overriding Consideration pursuant to Section 15091 and 15093 of the State CEQA Guidelines and Section 21081 of the Public Resources Code for the Final Subsequent Environmental Impact Report (Final SEIR) prepared for the City of Mountain View Draft 2030 General Plan and the City of Mountain View Greenhouse Gas Reduction Program – San Antonio Change Area (proposed project). The MMRP, which is found in Table 1, lists the mitigation measure recommended in the Final SEIR (which includes the Draft SEIR and Response to Comments documents) prepared for the proposed project, and identifies mitigation monitoring requirements. The Final MMRP must be adopted when the City Council makes a final decision on the project. The MMRP prepared for the 2030 General Plan EIR was adopted in June 2012. All mitigation measures in the 2030 General Plan EIR continue to apply.

This MMRP has been prepared to comply with the requirements of State law (Public Resources Code Section 21081. 6). State law requires the adoption of an MMRP when mitigation measures are required to avoid significant impacts. The MMRP is intended to ensure compliance during implementation of the project.

The MMRP is organized in a matrix format. The first column identifies the environmental impacts. The second column, entitled "Mitigation Measures," refers to the recommended mitigation measures. The third column, entitled "Responsibility for Compliance," refers to the entity responsible for mitigation measure implementation. The fourth column, entitled "Method of Compliance and Oversight of Implementation," refers to the manner in which the mitigation measure is implemented, and who has oversight over ensuring implementation of the mitigation measure. The fifth column, entitled "Timing of Compliance," details when monitoring will occur to ensure that the mitigating action is completed.

Environmental Impacts	Mitigation and Avoidance Measures	Responsibility for Compliance	Method of Compliance and Oversight of Implementation	Timing of Compliance
<b>PUBLIC SERVICES</b>				
<b>Impact PSR-1a:</b> Reduced service ratios and response times for fire and police protection during construction.	<p><b>Mitigation Measure PS-MM-1:</b> Develop and implement a construction traffic control plan.</p> <p>Prior to issuance of grading permits, the construction contractor will develop the traffic control plan in accordance with City's policies and submit for City approval. The plan will be implemented throughout the course of project construction and may include, but will not be limited to, the following elements.</p> <ul style="list-style-type: none"> <li>• Limit truck access to the project site during peak commute times (7:00 a.m. to 9:00 a.m. and 4:00 p.m. to 6:00 p.m.).</li> <li>• Require that written notification be provided to contractors regarding appropriate routes to and from the project site, and the weight and speed limits on local roads used to access the project site.</li> <li>• Provide access for emergency vehicles at all times.</li> <li>• Provide adequate onsite parking for construction employees, site visitors, and inspectors as feasible.</li> <li>• Maintain pedestrian and bicycle access and circulation during project construction where safe to do so. If construction encroaches on a sidewalk, a safe detour will be provided for pedestrians at the nearest crosswalk. If construction encroaches on a bike lane, warning signs will be posted that indicate bicycles and vehicles are sharing the roadway.</li> <li>• Require traffic controls in the project area and the project entrance driveway, including flag persons wearing bright orange or red vests and using a "Stop/Slow" paddle to control oncoming traffic.</li> <li>• Post standard construction warning signs in advance of the construction area and at any intersection that provides access to the construction area.</li> <li>• Repair or restore the road right-of-way to its original condition or better upon completion of the work.</li> </ul>	City of Mountain View Public Works Department and Community Development Department	Implementation and continued monitoring of identified mitigation measure to maintain service ratios and response times for fire and police protection during construction	Ongoing
